

smartglass

Etihad HQ, CEO Boardroom

Abu Dhabi, UAE

SmartGlass was recently installed at Etihad's HQ in Abu Dhabi serving as a partition to the CEO's Boardroom.

SmartGlass allows for easy and instant alterations of space, delivering privacy to carry out important meetings and presentations without distractions from onlookers and co-workers.

In office interiors where ample lighting and the option of privacy are important, SmartGlass provides simple and reversible states of transparency with no alteration in light level making it an ideal solution.

Combining the functionality of an opaque wall with the style of clear glass, SmartGlass allows for an innovative and intriguing use of space.

Etihad Airways are one of the world's leading airlines servicing the globe from Abu Dhabi.
